The Honorable Julius Genachowski
Chairman, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: REPLY COMMENTS to LightSquared's License Modification Application and Petition

Dear Chairman Genachowski:

I want to lend my voice in support of LightSquared and its tireless efforts to launch a new, competitive mobile broadband network. I have recently become more interested in this company's quest and it appears that a solution is finally in sight. I sincerely hope that the Administration will approve the license modification application and allow this new network from an American company to become a reality.

I own and operate a medical billing company in Poplar Bluff, Missouri and understand how technology can make businesses like Health Partners Management Group just as successful as small businesses located in bigger metropolitan areas. I am convinced the network will spur competition and innovation in the wireless industry, but also expand the nation's broadband capacity by reaching many underserved neighborhoods like ones we serve in and around Poplar Bluff, Missouri.

I hope the Commission will finally put an end to this debate and grant LightSquared's application. LightSquared will give up its rights to use of the spectrum that was alleged to have caused interference with GPS devices in exchange for a sharing agreement with the government on a different band of spectrum. This seems reasonable and a fair path forward.

Thank you.

Very truly yours,

Cindy Burcham
